# Electronic Healthcare Record
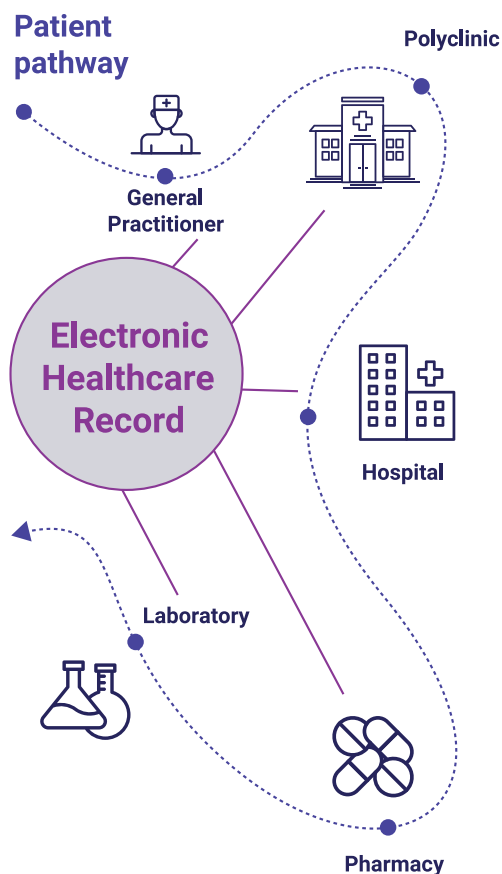

**Electronic Healthcare Record establishes continuity of care in modern healthcare across region or nationwide.**

## Benefits:

- Electronic healthcare record organizes healthcare provider's Electronic Medical Records summaries in clinically meaningful structure.

- Eliminate paper discharge letters, paper findings, time, and information loss.

- Focus on a patient and health issues at hand with available essential information and detailed clinical documents and data.

- Access crucial present and past health problems, active medication therapy and medication history, findings, discharge letters, allergies and intolerances, vaccination records, surgeries etc. in a matter of seconds.

- Adaptable datasets and views for specific medical specialties.

## Key features:

- FHIR based documents and resources.

- Role based access control with OAuth 2.0 and OpenID Connect

- Viewed data audit trail available for each patient

**Electronic Healthcare Record** is based on the comprehensive, innovative, and proven **Electronic Healthcare Exchange (EHE)** product portfolio.

**Electronic Healthcare Exchange** is a line of products fulfilling a variety of eHealth system needs, ranging from fundamental ones like infrastructure/security/ integration, over exchange and management of clinical documents and discrete medical information, to advanced functionalities like clinical decision support.

Solutions made of different **EHE products**, alone or through integration with existing infrastructure, support a wide range of processes in the healthcare system.

**Patient pathway**

- Polyclinic
- General Practitioner
- Electronic Healthcare Record
- Hospital
- Laboratory
- Pharmacy
