

# EHE Health Information Exchange

**EHE Health Information Exchange (EHE HIE) enables building of infrastructure for implementation of various clinical and administrative processes in healthcare domain.**

## Benefits:

- Enables the digital transformation of health processes
- Allows sharing of patient's vital medical information electronically improving the speed, quality, safety and cost of patient care
- Ensures all healthcare stakeholders' access to important information
- Supports encounter management
- Enables immunization programs
- Aids insurance stakeholders to actively participate in the processes
- Provides patients with access to clinical information.

## Key features:

- Based on modern healthcare standards HL7 FHIR
- Certified support of IHE profiles
- Extensive experience and knowledge built into product
- Customizable security mechanisms that ensure patient privacy and secure access to medical data
- Role based access control with OAuth 2.0 and OpenID Connect Protocols.

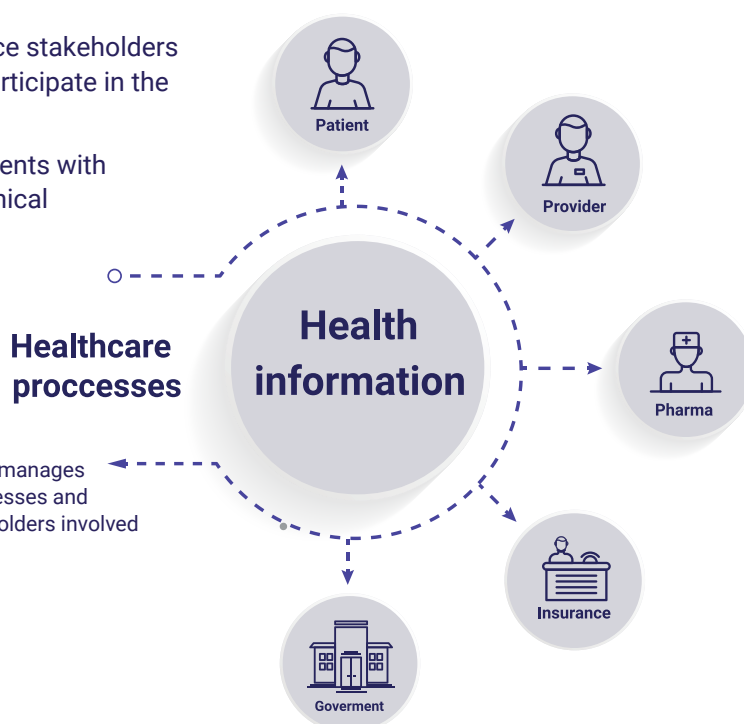

Figure: EHE HIE manages healthcare processes and keeps all stakeholders involved

EHE HIE is based on the comprehensive, innovative, and proven Electronic Healthcare Exchange (EHE) product portfolio. Appropriate and secure access to healthcare information is of paramount importance for the EHE HIE solution.

## Electronic Healthcare Exchange is a

line of products fulfilling a variety of eHealth system needs, ranging from fundamental ones like infrastructure/security/integration, over exchange and management of clinical documents and discrete medical information, to advanced functionalities like clinical decision support.

Solutions made of different EHE products, alone or through integration with existing infrastructure, support a wide range of processes in the healthcare system.
