

Filip Grilec is the Head of several engineering teams within the Research and Development (R&D) segment of Ericsson Nikola Tesla Group. He earned a Master's degree in Computer Engineering from the Faculty of Electrical Engineering and Computing, University of Zagreb, in 2015, after which he joined Ericsson Nikola Tesla as a Software Engineer.

Throughout his career, he has steadily taken on roles of increasing responsibility, progressing from Team Lead and Product Owner to leading multiple development teams, products and organizational units. Today, he focuses on the development of the organization, people, processes and technology solutions, with a particular emphasis on building high-performing teams and ensuring the sustainable growth of the organization.
