

Jelena Jurišić is the Chief Technology Officer (CTO) of Ericsson Nikola Tesla Group, responsible for technology strategy, innovation and the development of advanced digital solutions.

She began her career at Ericsson Nikola Tesla in 2006 and, over nearly two decades, has gained extensive experience in the ICT sector, the development of complex digital systems and the management of major digital transformation projects. She has led multidisciplinary teams and participated in the development and implementation of national projects in the areas of public administration, judiciary, tourism, education and culture.

Her focus is on long-term technology strategy, the development of innovative digital products and the strengthening of ENT Group's competencies in artificial intelligence, advanced networks and cybersecurity..
